Christmas Applique Designs.

<http://www.secretsof.com/content/1852>

Petro used satin fabric and batting (130gsm). The batting is used to give the applique designs a puffy look. The designs can also be stitched out without using the batting. The fabric is trimmed to size after the basting stitch. You can test sew this method by downloading the cherry freebie from the above link.

Step 1: Place two pieces of 130 gsm batting and one layer of fabric on top of applique position.

Step 2: Pin fabric and batting in place - remember to pull fabric really tight to avoid creases.

Step 3: Attach hoop to machine and stitch out trim line

Step 4: Remove hoop (don't remove fabric from hoop) and cut batting and fabric among trim line.

Step 5: Attach hoop to machine and stitch tack down and satin stitch.

Step 6: Finish off design.

Project Idea using the Christmas Applique Designs
