Please read through these instructions completely before beginning.

You will need Tote bag (bought or made) WSS, Stitch N Shape, Timtex or other stiffener product. Ribbon or wire for hanger and beads if you want. 3" x4" piece of terry for towel.

These instructions are based on use of pre made bag.

Open up one side of tote. I used Perfect Stick stabilizer in my hoop, oversized it and peeled the outer edges, so all the stabilizer was sticky to help hold the tote bag in place in and out of the hoop.

Fold the piece of "towel" and position it at the left top edge before stitching the design. Follow the instructions of the design. You can either skip the colors for the back fabric placement OR just stitch them, that's what I did.

When you have stitched the sign onto the bag, you will stitch the extras designs on WSS. Only use fabric and stiffener on the top only, skip back fabric placement. Trim closely and remove last bits of WSS. Make a few small holes and put the wire through, add the beads and make 3 hangers with the swim suits and sun. Take one hanger and poke the wire through the front of bag to the inside and then back to the front, twist the wire tightly to fasten closed. Glue the suits, towel and sun down to the bag.
