

## Using the 3D Stitch View

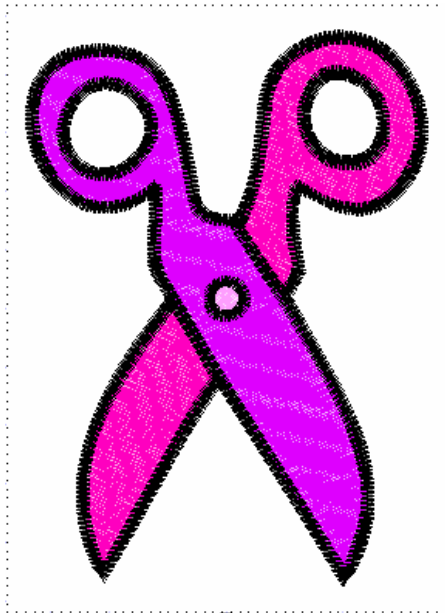

**Click on the 3D Stitch View icon on the top tool bar. This allow you to view your design in a 3 Dimensional Stitch View.**

**It is always a good idea to view your design in 3D Stitch View just to check that the stitches are how you would like them. Do this before you save your design.**

**You can turn 3D on and off or work with it on all of the time.**

**Note: If you choose to work with it on, be aware that 3D view does use slightly more computer memory.**
